

Cameron County Regional Mobility Authority

Bridgeport, PA – March 22, 2019

In mid-March 2019, a team comprising E-Transit and the Portuguese roadway management company A-To-Be, began work on a project to design and deploy new toll/fee collection systems at three international bridges as well as five beach and park locations in and around the Brownsville, TX and South Padre Island, TX areas. E-Transit is responsible for all of the technology items to be delivered and A-To-Be is responsible for overall contract and project management.

As part of the project, E-Transit will be designing manual, ETC, and payment machine solutions at multiple beach and park toll lanes. This new system will interface with CCRMA's existing ETC back-office and will for the first time, allow CCRMA's Rt. 550 ETC customers to seamlessly use their existing ISO 18000-6C tags to pay tolls and fees at the region's bridges and parks.

Customized software applications as well as new E-Transit-designed outdoor toll payment machines, PCI-compliant contact and contactless credit card readers, and new ISO 18000-6C ETC readers will replace the existing payment systems.

In accordance with CCRMA's wishes, E-Transit's flexible software will interface with existing lane controller computers, toll terminals, AVC equipment, networks, etc.

Both the bridge and beach/parks systems will include E-Transit's ITV-3000 DVAS technology to enhance the system's accuracy, auditability, and availability.

About E-Transit:

E-Transit is a leader in information and control systems for the transportation, ports, and security industries. Our team includes experienced systems professionals who provide consulting, hardware/software design, and system integration services for intelligent transportation, security, toll and revenue collection, point of sale, industrial control, and auditing applications. We use off-the-shelf components, standardized communication protocols, open computing systems, and conservative design practices.

The Company has ongoing projects and installations in the USA, and abroad. The company E- was founded in 2000 and operates from offices in Bridgeport, Pennsylvania (approximately 20 miles from Philadelphia).
