

EMV Credit Card Processing Upgrade for the Louisiana LA-1 Toll Road

Bridgeport, PA – Mar 14, 2020

E-Transit has been contracted to upgrade a toll booth credit card processing software system that was initially deployed in 2014. The reason for the upgrade was to allow the system to be consistent with the recent selection of Elavon as the state-wide credit card processing vendor.

Significant software changes were required in order to provide PCI-compliant interfaces to both a new Ingenico credit card terminal as well as Elavon's cloud-based processing platform.

This software package runs on the existing Microsoft Windows 10-based manual lane operator terminal. The new software has been designed such that no changes to the existing operator terminal software were required.

The upgrade is expected to begin revenue operation in mid-May 2020.

About E-Transit:

E-Transit is a leader in information and control systems for the transportation, ports, and security industries. Our team includes experienced systems professionals who provide consulting, hardware/software design, and system integration services for intelligent transportation, security, toll and revenue collection, point of sale, industrial control, and auditing applications. We use off-the-shelf components, standardized communication protocols, open computing systems, and conservative design practices.

The Company has ongoing projects and installations in the USA, and abroad. The company E- was founded in 2000 and operates from offices in Bridgeport, Pennsylvania (approximately 20 miles from Philadelphia).
